

Automate every process with one platform

Use K2 to deliver process automation at scale across your business.
From integrated, mission-critical processes to lightweight, departmental tasks.

According to
Forrester Research,
using K2 saves
78%
development
time

Companies around the world use K2 to do things like:

Reduce customer onboarding from days/weeks to **40 minutes**

Maintain **100% compliance** with data requirements

Create U.K.'s first end-to-end acute healthcare **business continuity management system**

Process purchase orders and issue them to suppliers **up to 90% faster**

The K2 Platform: Everything You Need to Automate All Your Processes

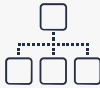

Integrate with Anything

Connect all your systems and data quickly. Reusable integration points let you build once and deploy across your business.

Feature-Rich Forms

Create and publish forms in minutes. Advanced features mean you can customize for every need.

Workflow Without Code

Visual design tools, reusable components and built-in logic help you automate faster.

Deeper Analytics

Get the real-time process insights and data visualization you need to make smart decisions.

Faster Apps

Build a solution in three steps or download ready-to-go apps. Either will help you get a jump start on deployment and reducing the IT backlog.

Make Apps Mobile

Do business from anywhere, at any time – even when you're offline.

Security & Governance at the Core

Maintain regulation and compliance standards through our comprehensive security and auditing tools.

Choice of Deployment

Whether your company is moving to the cloud or needs to stay on-premises, K2 runs wherever you need it to.

I don't worry too much about the future. Whatever the business needs and whatever new acquisitions we make, I know that we can create the workflows required using K2.
